Senior Applications Analyst

Description

A most prestigious national law firm is seeking a Senior Applications Manager to lead its team of application developers and ensure the successful delivery of our applications. The ideal candidate will have extensive experience in managing enterprise applications, leading teams, and collaborating with other departments to ensure timely delivery and high-quality products.

Responsibilities

- Ensure compliance with best practices for software development, including security, performance, and scalability.
- Monitor and manage application performance to ensure optimal operation.
- Oversee application testing and quality assurance processes.
- Evaluate and recommend new technologies, methodologies, and tools to enhance the application development process.

Qualifications

- 5+ years of experience in supporting & managing a portfolio of legal applications
- Experience managing application development projects using industry-standard project management.
- Strong technical skills and experience with software development technologies.
- Strong analytical and problem-solving skills.
- Excellent leadership and people management skills.
